SUMMARY

Ambitious Computer Science undergraduate passionate about UI/UX design, algorithms, and software development. Proficient in Python and Java, with hands-on experience in building user-centric applications. Actively seeking an internship to apply my technical, problem-solving, and design skills in real-world projects

EDUCATION

Bsc(Hons) Computer Science , University of Westminster, UK

Jan 2024 - Present

Level 4: Passed 6 modules 120 credits

- Software Development I
- Mathematics for Computing
- Trends in Computer Science
- Computer Systems Fundamentals
- Software Development II
- Web Design and Development

Level 5: TBC

- Object Oriented Programming
- Database Systems
- Client-Server Architectures
- Human Computer Interaction and User Experience
- Algorithms: Theory, Design and Implementation
- Software Development Group Project

GCE Advanced Level Examination, St. Paul's Milagiriya

2022/2023

Physical Science Stream (Maths, Physics and ICT)

GCE Ordinary Level Examination, Ananda Balika Vidyalaya

2019

TECHINICAL PROJECTS

- **Innovastruct**

Oct 2024 -

Comprehensive construction project management app that streamlines planning, communication, and execution. The platform enhances transparency, accountability, and client satisfaction through data-driven decision-making.

Role: **Frontend Developer & UI/UX Designer**

Technologies: **Figma, React, JavaScript, Tailwind CSS**

- **Ticket Management System**

Oct - Dec 2024

A ticket management system facilitates efficient ticket distribution by connecting customers with authorized vendors, ensuring seamless transactions and organized support.

Technologies: **Java, React, Springboot**

- **Food Connect**

Oct - Dec 2024

The SDG-focused app reduces food waste through donation, composting, and meal planning, helping users promote sustainability and support shelters.

Technologies: **Figma**

- **Student Management System**

June - July 2024

A Java program to store, update, and delete student details, with records saved in a separate file for easy access and efficient data management.

Technologies: **Java**

- **Personal Finance Tracker**

Feb- March 2024

A Python-based finance tracker with a user-friendly GUI, allowing users to log, categorize, and analyze expenses for improved financial management.

Technologies: **Python**

- **Conserve Water Life**

June -July 2024

An SDG "Life Below Water" app educates users on reducing plastic use, protecting underwater ecosystems, and promoting marine conservation.

Technologies: **HTML, CSS, JavaScript**

EXPERIENCE

- **Sales Executive (Part Time)** - Montrianna Clothing Store Jan 2024-Jan 2025
 - Managed the system, sales transactions, updating inventory, and promoting brand awareness
 - Assisted customers with product selection and personalized recommendations.
 - Developed strong communication, negotiation, and customer service skills.
-

EXTRACURRICULAR ACTIVITIES

- **IEEE Computer Society Student Branch of IIT**
 - Volunteer Management Coordinator 2025
 - Program and logistics member for CodeRally 5.0 2024
- **LEO club of IIT**
 - Ushered for the Awards One 2024
- Volunteered as a logistic member at Cutting Edge 2024
- Senior Science Society 2020-2022
- **Chess**
 - National Achievement 2017 (one-star)
 - Interhouse sports meet Chess Champion 2019
- **Hockey**
 - Provincial Achievement 2017 (bronze-star)
- Senior brass band (2016-2019)
- Senior choir (2016-2019)

Certifications

- IIEEE Xtreme 18.0
 - Postman API Fundamentals Student Expert certification
 - React Essential Training
 - GenAI 101 with Pieces
-

SKILLS

Technical Skills

Languages

- Java
- Python
- HTML
- CSS
- JavaScript

Frameworks

- React
- Tailwind CSS
- SpringBoot

Design & Prototyping Tools

- Figma

Soft Skills

- Leadership
- Teamwork
- Adaptability
- Communication
- Work Ethic
- Time management
